Certificate: **86-C-0073**
Site: 002
BILLY HARVEY

Type: ROUTINE INSPECTION
Date: 29-SEP-2014

3.84(a)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

***The shelf partition between the indoor and outdoor portion of the enclosure housing 2 lemurs, non-human primates, had an excessive accumulation of debris (food debris, dirt, excreta etc.) on its surface. This dirty shelf comes into regular contact with and poses a health risk to the animals. An excessive accumulation of waste/debris can increase insects, pests, and odors, and may harbor pathogens and play a role in disease transmission. Perches, bars, and shelves must be kept clean and replaced when worn. Surfaces should be cleaned at a frequency that is adequate to maintain standard husbandry practices.
To be corrected by 10/10/14.

3.131(a)

SANITATION.

*** The enclosure housing 1 raccoon had an excessive accumulation of debris (food debris, dirt, hair/fur, excreta etc.) on and in the housing structure. The dirty housing structure comes into regular contact with and poses a health risk to the animal. An excessive accumulation of waste can increase insects, pests, and odors, and may harbor pathogens and play a role in disease transmission. These surfaces should be cleaned at a frequency that is adequate to maintain standard husbandry practices.
To be corrected by 10/10/14.

Inspection and exit interview was conducted with the owner.
