Type: ROUTINE INSPECTION
Date: 11-SEP-2018

3.4(c)

OUTDOOR HOUSING FACILITIES.

*** Building surfaces in contact with animals in outdoor housing facilities must be impervious to moisture.***

Two adult dogs are housed in an outdoor enclosure. This enclosure has a sheltered area on the back corner of the rabbit building. The interior walls of this area are constructed of unsealed lumber. The lumber has been chewed in some areas and roughened to the point of making cleaning and sanitation very difficult. This area must have all areas in contact with the dogs sealed or covered to be made impervious to moisture. To be corrected by: 09/25/18

3.6(a)(1)

PRIMARY ENCLOSURES.

***Primary enclosures must be designed and constructed of suitable materials so that they are structurally sound.

The primary enclosures must be kept in good repair.***

The enclosure on the back corner of the rabbit building has an area of 2 inch by 4 inch wire. A section of this wire next to the gate into this pen has multiple broken strands and allows the dogs to attempt to push their head through the opening. This wire must be replaced and or repaired to be made structurally sound. To be corrected by: 09/18/18

This inspection and exit interview were conducted with the owner by Curt McGruder-ACI.
