### Repeat

#### Facilities, general.

In the enclosure for the two zedonks and in the enclosure for the two zebras, there are strings of baling twine leftover from hay that was fed to the animals. Inappropriate materials in the enclosure can lead to ingestion or entanglement. All housing facilities must be constructed of such material and of such strength as appropriate for the animals involved. All housing facilities shall be structurally sound and shall be maintained in good repair to protect the animals from injury and to contain the animals.

This inspection and exit interview were conducted with a facility representative.
