Attending veterinarian and adequate veterinary care (dealers and exhibitors).

A female wood duck has been missing since 04/02/2025. The wildlife staff conducted daily searches of the outdoor habitat and around the property grounds for several days to locate the duck, however the duck was never found. At this time the wildlife staff conclude that the duck has been taken off property, escaped or is deceased. The ducks at this facility are flight-restricted and are allowed to freely roam within the outdoor housing facility.

Failure to conduct daily observations of this bird does not allow for accountability of the bird in the collection or for monitoring changes in health status or injury, which may lead to animal death. Daily observation of all animals must be performed to assess their health and well-being. A mechanism of direct and frequent communication is required so that timely and accurate information on problems of animal health, behavior and well-being is conveyed to the attending veterinarian.

This inspection and exit interview were conducted with a facility representative.
