Certificate: **14-C-0132**

Site: 001

THE RED APPLE FARM LLC

Type: ROUTINE INSPECTION

Date: 13-SEP-2021

---

### 2.40(b)(2)

#### Attending veterinarian and adequate veterinary care (dealers and exhibitors).

During this inspection it was noted that the Zebu's hooves were in need of attention. The back hooves are excessively long. These hooves are approximately 2" - 3" overgrown. To ensure that these hooves do not impede on this zebu's gait they will need to be addressed. A preventative measure will also need to be implemented to ensure that the hooves are maintained appropriately.

\*\*\*To Be Corrected By: October 9, 2021

### 3.125(a)

#### Facilities, general.

1. There is a small enclosure that houses 2 goats. This pen has a small shelter adjacent to the pig enclosure. The top of this shelter is approximately 3' off of the ground and has a tin roof. The tin roof material has begun to curl up along the edges and has split. There are now jagged edges present. To ensure the safety of the goats this roofing material will need to be addressed.

\*\*\*To Be Corrected By: September 18, 2021

2. The pig enclosure has an area by the gate, that is adjacent to the larger pen, that is in disrepair. There are 3 panels of fencing that are being held in place with baling twine. However, the pigs have been able to get between these 3 panels.

## Inspection Report

---

There are now gaps and jagged edges present. All fencing needs to be secured with appropriate fasteners so that the animals can not gain access to the various sections of fence.

\*\*\*To Be Corrected By: September 18, 2021

### 3.125(c)

#### Facilities, general.

At the time of the inspection it was noted that the salt block was being stored in a food trough. However, it had rained overnight and now that trough was filled with water. The salt block was now sitting in approximately 2" of water. To protect this food source from deterioration, this will need to be addressed.

\*\*\*To Be Corrected By: Sept 14, 2021

### 3.131(c)

#### Sanitation.

While conducting this inspection it was noted that there were 5 buckets of manure and soiled bedding, in the pen that housed 5 goats, 1 zebu and 2 donkeys. These buckets were by the gate, along the back fence line. To protect the health of the animals these buckets can not be left in the animal enclosures.

\*\*\* To Be Corrected By: September 14, 2021

This inspection and exit interview were conducted with a representative of the licensee.
