Certificate: **55-C-0198**  
Site: 001  
TOWN OF WINDSOR

Type: ROUTINE INSPECTION  
Date: 06-SEP-2023

---

### 2.40(a)(1)

#### Attending veterinarian and adequate veterinary care (dealers and exhibitors).

The current written Program of Veterinary Care (PVC) does not include the bird species at this facility. Birds are now regulated by the Animal Welfare Act as of 21August2023 and must be included in the written program. The Attending Veterinarian already evaluates the birds at this facility, but the guidance provided for the licensee is not documented in the PVC. Not having all covered animals at a facility included in the PVC can result in potential suboptimal veterinary care and daily observations. The regulations state that each dealer and exhibitor shall employ an attending veterinarian under formal arrangements. In the case of a part-time attending veterinarian or consultant arrangements, the formal arrangements shall include a written program of veterinary care and regularly scheduled visits to the premises of the dealer or exhibitor. Correct by 25September2023.

### 3.154

#### Environment enhancement to promote psychological well-being.

A Bird Environmental Enrichment Plan (BEEP) was not available for review during this inspection. The BEEP is currently under development but has not been finalized and signed by the Attending Veterinarian (AV). Not having the required BEEP in place can result in inadequate environmental enhancement for the birds. The regulations state the following: Dealers, exhibitors, and research facilities must develop, document, and follow a species-appropriate plan for environment enhancement adequate to promote the psychological well-being of birds. The plan must be approved by the attending veterinarian and must be in accordance with the regulations in this subpart and with currently accepted professional standards as cited in appropriate professional journals or reference guides. This plan must be made available to APHIS upon request. Correct by 25September2023.

This inspection and exit interview were conducted with the facility representative.
