Certificate: 58-C-0447

Site: 001

FRANZEN BROTHERS CIRCUS INC

Type: ROUTINE INSPECTION

Date: 24-JUL-2019

2.40(b)(3)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

The African elephant named Megu was observed to have certain gait deficiencies and joint crepitus was heard while walking the elephant.

When the licensee was asked about the gait issues he had not been aware of such condition because the elephant did not seem to be in pain so the condition was not reported to the attending veterinarian (AV) prior to the inspection.

The attending veterinarian (AV) was contacted and he then visited during the inspection, agreed with my findings and concluded that further evaluation of the elephant needed to be conducted.

The AV stated the elephant should not participate in any performance until further evaluation and his permission for release after appropriate treatment if he determined that the elephant was fit for future show performances.

To be corrected ASAP.

This inspection and exit interview were conducted with facility representative and the AV.
