LE ANN ROY

Type: ROUTINE INSPECTION
Date: 06-NOV-2014

2.75(a)(1)

RECORDS: DEALERS AND EXHIBITORS.

Records

****On the APHIS 7005 there are 25 dogs listed. The actual count during the inspection was 28 adult dogs. Proper and accurate record keeping is essential to know how many dogs are in the facility to facilitate record keeping requirements for inventory, disposition, transport, and healthcare. The APHIS 7005 must be made and kept current on all dogs in the facility.

3.4(a)(1)(3)

OUTDOOR HOUSING FACILITIES.

(a) Restrictions.

****In the outdoor facility there is a female and litter of 5 week old puppies housed in an insulated shelter. The dogs are a short-haired breed. The temperature the night before was under 50F. There was a heat lamp in the shelter, hanging from the top of the 4-foot shelter, but the female bit the wire through. On the Program of veterinary care section on outdoor housing, the attending veterinarian wrote "not applicable". There is no statement of approval by the attending veterinarian for housing the young puppies outside. The owner must ensure for the health and safety of the young puppies by housing them properly.

3.4(b)

OUTDOOR HOUSING FACILITIES.

(b) Shelter from the elements. Shade

****In the outdoor facility there were enclosures that did not provide sufficient shelter structures for each of the enclosed dogs. Two large dogs shared a shelter that was large enough for one of those dogs. When one of the dogs went into the enclosure, it took up almost the entire space. There were 2 medium size dogs that shared a plastic 55 gallon barrel but there was only space enough for 1 of those dogs to sit, stand, and lie in a normal

Inspection Report

manner. When 1 dog was in the shelter, there was no longer space for the other dog to have normal posture and movement while inside the structure. Shelter space is important to protect the dogs from the weather and wind. Sufficient housing for all dogs is essential for the comfort and well being of the animals. More shelter space must be provided for all dogs at all times.

****The outdoor facility has metal roofing over most of the enclosures that provides shade and protection from the direct rays of the sun. There are 4 enclosures that do not have any roofing or shade over them. It is important for dogs to have shade so they can get relief from the direct rays of the sun. Shade must be provided and maintained for all dogs at all times.

3.6(a)(2)(1)

PRIMARY ENCLOSURES.

Sharp points

****The wooden step in front of the large shelter has 4 nails that have come through from the opposite side of the board. The ends are the sharp points of the nails and could injure the puppies as they move about. The owner must ensure the safety and well being of the dogs by preventing sharp points in the enclosures that could injure the dogs. The sharp points must be removed.

3.6(a)(2)(2)

PRIMARY ENCLOSURES.

(2) Primary enclosures

****In the large shelter housing a female and her litter of puppies, there was a heat lamp whose cord had been bitten through. Had this light been plugged in, the dog could have received a severe injury. The owner must ensure for the safety of the dogs by placing electric cords such that the dogs cannot contact them.

No regulated activity can be conducted from this site until it has been approved. When ready for another inspection please contact your inspector.

Inspection and exit interview done with facility representative.
