Site: 001

NEBRASKA COLLEGE OF TECHNICAL

Type: ROUTINE INSPECTION

Date: 27-SEP-2016

2.33(b)(5)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE.

A number of flies were observed hovering around the head of horse used for teaching. Ocular drainage was observed on the skin below the left eye of the horse. According to a staff member and written instructions on the stall door, a fly mask was to be placed on the horse daily as part of the treatment of a small open mass on the eyelid.

Failure to protect open wounds from flies may interfere in the healing process and cause discomfort to animals. Staff should ensure that treatment plans are followed in accordance with established veterinary medical and nursing procedures.

Corrected at the time of the inspection.

This inspection and exit interview were conducted with a facility representative.
