

Inspection Report

The Mobile Zoo
15161 Ward Road
Wilmer, AL 36587

Customer ID: **31840**
Certificate: **64-C-0178**
Site: 001
THE MOBILE ZOO

Type: ROUTINE INSPECTION
Date: 02-MAR-2016

3.75(c)(1)

HOUSING FACILITIES, GENERAL.

** In the rhesus and bonnet macaques night house the wooden floor had moisture damage and evidence of stains. There was also a pungent odor coming from the night house. The night house should be made of materials and constructed in a manner to allow it to be readily cleaned and sanitized, or removed and replaced when worn or soiled for the well-being of the animals. Corrected by exit interview.

3.84(a)

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

** In the Grey-cheeked mangabey's night house there was excessive accumulation of dried hard feces covering the floor. There was also a foul odor present. Feces must be removed from inside the night house daily to prevent the nonhuman primates from becoming soiled, and to reduce disease hazards, insects, pests, and odors. Corrected by exit interview.

3.125(a) REPEAT

FACILITIES, GENERAL.

** The primary enclosure housing 6 patagonian caviars had a hole that went beneath the fence. The mouth of the hole was about 10-12 inches wide and about 4-6 inches tall. The hole poses a risk of escape to the animals. A system should be in place and maintained to ensure all animal facilities are structurally sound and in good repair to contain the animals.

The inspection and exit interview was conducted with the Director and Dr. Simone Tomlinson.

Additional Inspectors

Tomlinson Simone, Veterinary Medical Officer

Prepared By: ANNETTE CHAPMAN, D V M USDA, APHIS, Animal Care
