Certificate: **23-C-0316**
Site: 001
BRENDON KLINE

Type: ROUTINE INSPECTION
Date: 16-NOV-2017

3.127(b)

FACILITIES, OUTDOOR.

Shelter from inclement weather. The shelter needs repair in the enclosure housing the new llama and donkey. Part of the north wall is missing and part of the wall is broken. There is no siding on the west side which allows the prevailing winds to enter the shelter. This shelter must be repaired or replaced. Adequate shelter must be provided for all animals kept outdoors to afford them protection and to prevent discomfort. Correct by December 2, 2017.

3.131(a)

SANITATION.

Cleaning of enclosures. There are accumulations of wet bedding and feces in the enclosure in the barn housing the 26 adult pot-bellied pigs. Excreta and wet bedding must be removed from enclosures as often as necessary to prevent contamination of the animals and to minimize disease hazards and odors. Correct by ensuring that all enclosures are cleaned often enough to prevent an accumulation of excreta, wet bedding, and debris. Correct by November 18, 2017.

This inspection and exit interview were conducted with the owner.
