Site: 001

DAUSET TRAILS NATURE
CENTER

Type: ROUTINE INSPECTION

Date: 19-APR-2022

2.131(c)(1)

Handling of animals.

At the farm exhibit, the public is allowed to walk directly up to the primary enclosures that contain goats, sheep, cows, and pigs with no attendants or public barriers present. The primary enclosures' fences and gates are approximately 4 feet high with spacing between the rails that allow hands or arms to reach through and touch the animals. Recently, a member of the public was nipped by one of the pigs. Unattended public contact does not ensure safe public interaction with the animals and may lead to injury of the public and/or the animals. The licensee must ensure that during periods of public exhibition, animals are handled with sufficient distance and/or barriers between the animals and the general viewing public to help assure the safety of animals and the public.

MUST BE CORRECTED BY: 06/20/2022

This inspection and exit interview were conducted with facility representatives.
