Certificate: **21-C-0339**  
Site: 001  
JENNIFER CLARK

Type: ROUTINE INSPECTION  
Date: 09-SEP-2014

### 3.128

#### SPACE REQUIREMENTS.

\*\*\* The skunk is housed during the day in the small bathroom in a small dog crate. This crate does not provide enough space to allow for adequate freedom of movement so the animal can engage in species appropriate behaviors. This animal needs to be moved into a bigger primary enclosure that meets the above requirements. This needs to be addressed for the health of the animal.

Correct by: Sept 20, 2014

### 3.131(c)

#### SANITATION.

\*\*\* The facility is in the process of moving the animals from the current animal room in the basement to a room upstairs. Until the move is complete, the animals are throughout the house and backyard area. There is a variety of items and household clutter around the animals throughout the house. These animals need to be moved to a designated animal space to keep their area clean and to facilitate good housekeeping and husbandry practices for their cleaning and care.

Correct by: Nov 10, 2014

An exit briefing was conducted with the licensee at the time of the inspection.
