Certificate: **74-C-1023**

Site: 001

Wildlife Refuge & Sanctuary Silver Wolf Inc.

Type: ROUTINE INSPECTION

Date: 18-OCT-2017

### 3.125(a)

#### FACILITIES, GENERAL.

The following areas are in need of repair or replacement .

-A fence post in zebra pen # 3 is broken at the ground level causing fence to lean.

-The zebra cage has a leaning fence due to bent T posts.

The fence is not structurally sound due to these damaged areas, therefore the animals could escape. All fences must be maintained in good repair to maintain structural strength and prevent injury or escape of the animals .

CORRECT BY : 11/19/17

The enclosures housing the five tigers in the back pasture are deteriorating.

Fence wire in all enclosures is rusting and breaking such that there are weakened areas and gaps in the fencing. Due to the broken wires, there is a gap in the third pen where the lower fencing meets the kick-in. The horizontal tension wire has broken due to rusting in several places such that it is no longer anchored to the fence posts. Some fence posts have large rust holes that weaken them. Some trees within the enclosures have grown to the tops of the kick-in fencing. The rust damage to the fencing has weakened the structural integrity of the enclosures. The tree overgrowth provides a possible route for animal escape. These fencing must be repaired or replaced to restore structural strength and prevent injury or escape of the animals. The trees must be trimmed and maintained so that they do not grow near the fence. CORRECT BY: 11/01/2017

The inspection and exit briefing were conducted with a facility employee.

Additional Inspector : William Snow VMO
