Site: 001

Exotic Animal Encounter DBA
Debbie Dolittle's Petting Zoo

Type: ROUTINE INSPECTION

Date: 26-AUG-2024

2.40(b)(2)

Repeat

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

The yak's hair coat was soiled and matted over the hindquarters and along the underside of the animal's body. A soiled and matted hair coat can cause discomfort and lead to abnormal skin conditions. The licensee must address the issues noted with the yak to help ensure the health and well-being of the animal.

3.131(d)

Sanitation.

The facility does not have an adequate pest control program for insects. Numerous flies were present throughout the facility and on the animals and their food. Excessive numbers of flies can facilitate disease transmission and cause irritation and discomfort to the animals. A safe and effective program of pest control for flies must be established and maintained.

Correct by: September 25, 2024

This inspection and exit interview were conducted with the facility representatives.
