### 3.125(c)

#### Facilities, general.

The refrigerators used to store daily diets in the Farm Area and Auxiliary Animal Holding Building were noted to be dirty and in need of cleaning. There was brown material present on the surface of the shelving and on the door seal (Farm Area refrigerator) as well as an excessive amount of particulate debris on the shelving (refrigerators in both areas).

Per this Section, supplies of food shall be stored in facilities that adequately protect such supplies from deterioration. The storage of daily diets in refrigerators that are in need of cleaning risks contamination or deterioration of the food which can impact animal health. Facility staff corrected this item at the time of the inspection by thoroughly cleaning the refrigerators in these areas. To remain corrected from this date 10/4/24 forward.

This inspection was conducted with facility representatives from 10/2/24 through 10/3/24. The exit briefing was held with facility representative on 10/3/24.
