LAWRENCE, KS 66046

Customer ID: **321105**
Certificate: **48-B-0349**
Site: 001
Pet World Inc.

Type: RE-LICENSE INSPECTION
Date: 20-NOV-2023

2.40(b)(2)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

* A circular growth was observed on the left side cheek of one adult male rabbit. The growth was an estimated one inch to two inches in diameter, a half inch in height and was extending outwards. The applicant stated that the condition was first noticed two to three days ago. At the time of inspection the applicant had not contacted the attending veterinarian. Abnormal growths on the body can be indicative of injury or a disease process which may affect the health of the animal and can cause discomfort. The applicant must have this animal examined by a veterinarian to obtain an accurate diagnosis and appropriate treatment plan. The outcome of this consultation must be documented and provided to the inspector upon request. The applicant must ensure that all animals receive adequate veterinary care at all times.

3.154

Environment enhancement to promote psychological well-being.

* There was no written environmental enhancement plan for birds made available at the time of inspection. The environmental enhancement plan must be approved by the attending veterinarian. The plan at a minimum must address social grouping, environmental enrichment, special considerations, restraint devices and any exemptions. This plan shall promote the psychological well-being of birds. The physical environment in the primary enclosures must be enriched by providing a means of expressing non injurious species-typical activities. Species differences should be considered when determining the type or methods of environmental enhancement. Lack of environmental enhancement could lead to abnormal behavior patterns affecting the bird's mental and emotional health. Dealers must develop, document, and follow a species-appropriate plan for environment enhancement adequate to promote the psychological well-being of birds. This plan shall be made available to APHIS upon request.

This is a 1st Re-License Inspection for a Class B license. The inspection and exit briefing were conducted with the applicant.

All items must be in compliance within 2 more inspections or by January 20, 2024 or the applicant will forfeit the license fee and must wait 6 months to reapply. Please contact your inspector to schedule your next Re-License Inspection.

Regulated activity can continue under your existing USDA license until it expires.
