Site: 001
CRAIG TAYLOR

Type: ROUTINE INSPECTION
Date: 11-JUN-2015

3.1(c)(1)(1)

HOUSING FACILITIES, GENERAL.

In the main sheltered building there are nineteen (19) enclosures whose expanded metal type doors have excessively rusted surfaces which are rough and pitted. The doors need to be repaired or replaced to insure they can be properly cleaned and sanitized. Surfaces of housing facilities--including houses, dens, and other furniture-type fixtures and objects within the facility--must be constructed in a manner and made of materials that allow them to be readily cleaned and sanitized, or removed or replaced when worn or soiled. Interior surfaces and any surfaces that come in contact with the dogs must be free of excessive rust that prevents required cleaning and sanitization, or that affects the structural strength of the surface.

Affects twenty-three adults.

Correct by 2 July 2015

The inspection and exit briefing was conducted with the facility representative.

This is an electronic copy of the inspection report dated June 11, 2015.

Additional Inspectors

Bartels Mary, Animal Care Inspector
