OUT OF AFRICA WILDLIFE  
PARK, L L C

Type: ROUTINE INSPECTION

Date: 19-DEC-2023

---

### 3.150(c)(3)

#### Facilities, general.

Multiple surface types in two outdoor enclosures for birds have jagged edges and sharp points that could injure the birds. An outdoor primary enclosure for 2 adult Emus has a shelter constructed of different materials including corrugated metal where cut edges are jagged and corners are sharp to the touch. The "Community Aviary" for 1 Blue-and-yellow Macaw, 1 Scarlet Macaw, 2 Helmeted Guineafowl, 5 Ringneck Doves and 1 Red-crested Turaco also has corrugated metal used for sheltered housing and facility construction that has jagged cut edges and sharp corners. This enclosure also has a metal wire used as a fastener where the sharp end measuring approximately 2 inches is not secured and sticks out near eye-level of the ground-dwelling Helmeted Guineafowl. Additionally, there are 4 metal screws located above the entrance pointing into the enclosure where the sharp ends measure approximately 1/2 inch to 2 inches. Surfaces that have jagged edges or sharp points with which birds can come into contact may cause them injury.

Interior surfaces and surfaces of housing facilities that come in contact with birds must be free of jagged edges or sharp points that could injure the birds.  
Correct by 20 January 2024.

### 3.154(c)(2)

#### Environment enhancement to promote psychological well-being.

A male Scarlet Macaw "Big Bird" who is showing signs of psychological distress in appearance through feather plucking of the legs and flanks, does not have written documentation of additional environmental enhancement approved by the attending veterinarian. Failure to address signs of being in psychological distress in birds through additional environmental enhancement in accordance with attending veterinarian instructions may result in continued or worsening signs of affected animals.

Certain birds must be provided special attention regarding enhancement of their environment in accordance with the instructions of the attending veterinarian, including those that show signs of being in psychological distress through behavior or appearance.  
Correct by 20 January 2024.
