Type: FOCUSED INSPECTION

Date: 26-FEB-2020

2.131(c)(1) **Critical** **Repeat**

Handling of animals.

The facility is allowing public interaction with two coatimundis and two raccoons without ensuring minimal risk of harm to the animals and to the public. On January 26, 2020 bite injury was reported to the county health department. A coatimundi bit a member of the public causing a minor injury to one finger. In a room that houses two raccoons and two coatimundis the general public can enter the room and interact freely with the animals. An attendant is present but does not have control of the animals and they are free to roam about, jump and climb on people. The injury occurred during an exhibition when a coatimundi bit a member of the public. All animals during public exhibition must be handled so there is minimal risk of harm to the animal and to the public, with enough distance and/or barriers between the animal and the general viewing public to assure the safety of the animals and the public. The current method of handling these animals is not sufficient to prevent possible injury to the public. A more appropriate handling method that would minimize the risk of injury during public interactions must be established.

The facility is allowing public interaction with lemurs without ensuring that the animals are under direct control of the handler at all times. The animals were seen climbing and jumping onto the shoulders and around the head of the guests with no means to provide direct control. Allowing public contact without maintaining direct control of non-human primates

Inspection Report

can result in injuries to the animal and/or members of the public. Nonhuman primates used in uncaged public exhibits must be under the direct control and supervision of an experienced handler or trainer at all times when the public is present. Trained nonhuman primates may be allowed physical contact with the public, but only if they are under the direct control and supervision of an experienced handler or trainer at all times during contact. To be corrected from this day forward. This inspection and exit interview were conducted with the licensee.

This inspection and exit interview were conducted with the licensee.
