Single Vision Inc.
8185 Forest Hills Road
Melrose, FL 32666

Customer ID: **331487**
Certificate: **58-C-1117**
Site: 001
Single Vision Inc.

Type: ROUTINE INSPECTION
Date: 19-AUG-2025

3.125(a) Repeat

Facilities, general.

In the enclosure housing four red foxes and the enclosure housing two African crested porcupines, the animals have excavated under the wire dig guard. This has led to gaps beneath the wires which could allow an animal's foot and leg to pass through and potentially become entrapped or broken.

Enclosures that are not kept in good repair can result in injury from entrapment. The facility must be constructed of such material and of such strength as appropriate for the animals involved. The housing facilities shall be maintained in good repair to protect the animals from injury and to contain the animals.

3.131(d)

Sanitation.

The facility does not have a safe and effective pest control program in place.

- During the inspection, APHIS inspectors observed a lion kill a rat in its enclosure. In both prep kitchens, there is evidence of rodents. Droppings were seen on tables, the floor, and on other surfaces in the room.
- One female kinkajou gained access to a wasp trap that was hanging outside her enclosure. The trap had been destroyed and pieces of the broken trap were inside the enclosure.

Pests such as rats can spread disease and contaminate food, surfaces, and animal housing areas. Animals that are able to interact with pest control devices can be injured or killed. A safe and effective program for the control of insects, ectoparasites, and avian and mammalian pests shall be established and maintained.
To be corrected by September 4, 2025.

This inspection and exit interview were conducted with a facility representative.
