Type: ROUTINE INSPECTION  
Date: 08-OCT-2014

### 2.40(b)(2) REPEAT

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

\*\*\*A Shih-Tzu (#145532122A) had a dental condition. A yellowish-brown material was covering the surface of the dog's teeth. Some of the dog's teeth were missing and the dog had wet fur around the mouth. The gums were reddened and inflamed along the cheek teeth and upper canine teeth. Also, a creamy, grey to white material was noted along the gum line of some of these teeth. The gums had also receded along these teeth and the roots of some of the teeth were visible. The lower left cheek teeth also had a reddish discharge, with at least one very loose tooth. According to the licensee, this dog's teeth had been cleaned by a veterinarian around the time of 3/26 or 3/27 of this year. There was no additional written documentation regarding this dog's dental condition. The abnormal build-up of material on this dog's teeth can cause damage to the gum tissue and tooth structures. This dog's dental condition could be painful, may decrease the dog's ability to eat normally and negatively impact the overall health of the animal.

The licensee must have this dog seen by a licensed veterinarian no later than October 14, 2014 in order to ensure that an accurate diagnosis is made and that appropriate treatment plans are developed and followed. The licensee must develop and establish an effective dental care program and all dogs receive adequate veterinary care at all times.

Veterinary care for Yorkshire Terrier (#0A01403513), and English Bulldog (#036010061) from the July 2014 inspection have been addressed.

The inspection and exit interview conducted with licensee.

#### Additional Inspectors

Leisner Erika, Veterinary Medical Officer
