

## Inspection Report

Linda Kauranen  
86 Taunton St  
Lakeville, MA 02347

Customer ID: **33327**  
Certificate: **14-C-0097**  
Site: 001  
LINDA KAURANEN

Type: ROUTINE INSPECTION  
Date: 16-MAY-2016

### 3.1(e)

#### HOUSING FACILITIES, GENERAL.

Storage.

1. There were 5 un-opened bags of cat litter that were being stored directly on the floor of the dog/cat housing area.

Per this Section of the Regulations, supplies must be stored off the floor and away from the walls to allow cleaning underneath and around the supplies.

The licensee needs to store supplies of cat litter up off the floor.

Correct by 5/24/16.

### 3.6(a)(2)(1)

#### PRIMARY ENCLOSURES.

Primary enclosures for dogs and cats.

1. Each of the 3 enclosures used to house 4 puppies (1 enclosure) and 11 kittens (2 separate enclosures) had part of one wall that was constructed using chicken wire. Some of the edges of chicken wire were noted to have sharp points that curled inwards into the enclosures. Sharp wire points can cause injuries to the animals.

Per this Section of the Regulations, primary enclosures must be constructed and maintained so that they have no sharp points or edges that could injure the dogs and cats.

The licensee needs to repair or replace the chicken wire in the 3 enclosures.

Correct by 5/31/16.

Date:  
16-MAY-2016

## Inspection Report

---

### 3.6(b)(4)

#### PRIMARY ENCLOSURES.

Resting surfaces for cats.

1. The primary enclosure that housed 7 kittens did not have a sufficient number of elevated resting surfaces that could hold all of the kittens at the same time.

Per this Section of the Regulations, each primary enclosure housing cats must contain a resting surface or surfaces that, in the aggregate, are large enough to hold all the cats housed in the primary enclosure at the same time comfortably. The resting surfaces must be elevated, impervious to moisture, and be able to be easily cleaned and sanitized, or easily replaced when soiled or worn.

The licensee needs to ensure that all primary enclosures used to house cats are provided with a sufficient number of elevated resting surfaces that can hold all the cats comfortably at the same time. This primary enclosure must be provided with additional elevated resting surfaces.

Correct by 5/31/16.

NOTE - Exit interview held 5/16/16 on-site with Licensee. Report delivered by e-mail 5/16/16.
