

Inspection Report

Clinton Wolston III
5050 F M 517
Alvin, TX 77511

Customer ID: **4870**
Certificate: **74-C-0153**
Site: 001
CLINTON WOLSTON III

Type: ROUTINE INSPECTION
Date: 23-JUL-2019

2.40(a)(1) REPEAT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

The licensee does not have a written program of veterinary care. Each exhibitor shall employ an attending veterinarian under formal arrangements to ensure that adequate veterinary can be provided to the animals on the premises. Formal arrangements with a part time or consulting veterinarian must include a written program of veterinary care for all species that reflects veterinary, husbandry, handling and dietary practices at the facility and regularly scheduled visits by the veterinarian often enough to provide appropriate oversight of the care and use of the animals.

2.75(b)(1) REPEAT

RECORDS: DEALERS AND EXHIBITORS.

No records of acquisition, disposition, or any other written documents stating where animals at the facility came from or disposal could be presented to the inspectors.

A written inventory of animals on hand has not been updated to reflect animal births, deaths, dispositions or new animals at the facility.

Records of animals on hand, acquisition, disposition, and transportation of all animals that come, go or reside in the facility grounds is essential and necessary in order to properly track the animals whereabouts at any given time. The licensee must develop a record of all mammals exhibited on the facility grounds and ensure that it is kept up to date as needed when animals are born, expire, or are bought, sold or otherwise transferred on or off of the facility grounds as required.

3.125(a) REPEAT

FACILITIES, GENERAL.

In the enclosure housing two Cavy, a portion of wire fencing that had been buried under the ground had been exposed and the animals had access to them.

The enclosures containing Peccary, Muntjac, and Red Kangaroo contained shelters made of wood that were

Inspection Report

cracked and bowing, had water damage, or contained holes in the sides caused by damage.

Fencing and shelters in disrepair can cause animals within to become injured and poses hazards including but not limited to injury, animals escaping or unwanted animals entering enclosures. The licensee must repair, replace, or discontinue using these areas to enclose animals.

3.130 REPEAT

WATERING.

The following areas contained watering receptacles in which insect larva was noted inside and that contained water that was discolored, and contained green, organic material inside: Petting zoo, Giraffe, and Camel.

Animals are susceptible to parasites and can become ill from contaminated or unclean water. Animals must be provided clean fresh water in sanitized receptacles.

3.131(d) REPEAT

SANITATION.

No formal pest control program could be presented to the inspectors. During the inspection, the representative stated there continues to be a problem at the facility with buzzards injuring or killing newborn animals. Buzzards were observed in various places throughout the facility.

Without a formal and active pest control program, there is a serious health and safety risk to the animals, and risk of contamination to food and water stores. The licensee must develop and execute a pest control plan throughout the facility in order to attempt to mitigate the above mentioned problems.

This inspection and exit interview were conducted with site manager.
