2.131(c)(1)

HANDLING OF ANIMALS.

*** The kangaroo barrier fence is made of chain link attached to 4 inch diameter posts. Parts of the barrier fence are loosely attached with twine and wood boards. The top of the chain link is bent downward which may allow the public to come in direct contact with the animals. Barrier fences should be kept in good repair and constructed in a manner that prevents direct public contact. The barrier fence must be repaired in a manner that minimizes public contact with the animals. Correct by July 30, 2015

This inspection was conducted by Gloria S. McFadden and the Prince William County Animal Control. An exit briefing was conducted by Gloria S. McFadden with the zoo director and the zoo vice president.

The licensee facility director refused to sign the inspection report. A copy of the inspection report was left at the facility.
