#### Feeding.

Food receptacles for the nonhuman primates at the offsite location are not being sanitized once every 2 weeks, instead they are being cleaned daily with sanitization only occurring once a month, per the licensee. Adequate sanitizing of food receptacles is necessary to ensure the health of the animals by preventing spread of disease and contamination. Food receptacles must be sanitized using live steam under pressure, hot water over 180 degrees Fahrenheit and soap or detergent, or detergent/disinfectant (after removing organic material first) followed by a clean water rinse at least every two weeks.

Correct by 06/01/2025.

This inspection and exit interview were conducted with the licensee.
