Tyra Tech
Po Box 844
Morrisville, NC 27560

Customer ID: 331429
Certificate: 55-R-0147
Site: 001
TYRA TECH

Type: ROUTINE INSPECTION
Date: 13-APR-2015

2.31(d)(1)(3)

INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC).

Assurance that no unnecessary duplication.

(1) Review of Protocol #1: There was no written assurance that the activities described in this protocol do not unnecessarily duplicate previous experiments as is required per this Section of the Regulations.

The IACUC needs to address this issue that was identified for this protocol.

Correct by 5/15/15.

3.50(c)

FACILITIES, GENERAL.

Food storage.

(1) There was an opened bag of rabbit feed sitting on the floor of housing room. Storing opened bags of food in this manner does not adequately protect the food from contamination or the deterioration of nutrients.

Per this Section of the Regulations, supplies of food should be stored using a method that will adequately protect the food from contamination or nutrient deterioration such as placing the food in a container with a lid.

Correct by 4/25/15.

3.56(c)

SANITATION.

Housekeeping.

The following housekeeping items were identified during the inspection.

Prepared By: PAULA GLADUE, V M D USDA, APHIS, Animal Care

17-APR-2015

Title: VETERINARY MEDICAL OFFICER 1054

Received by Title: REPORT DELIVERED BY E-MAIL 4/17/15

Date:
17-APR-2015

Inspection Report

(1) There was an excessive amount of dust, hair, and particulate debris located on the top of the caging rack that held primary enclosures containing rabbits. In addition, there was an empty food dish, tube of medication, cleansing wipes, and a small cleaning brush located on the top of the caging rack.

(2) The epoxy paint on the wall around the wall-mounted faucet and hose unit right above the janitor sink in the procedure room had several areas where the paint had lifted up and come away from the underlying wall board. There were some areas of the wall that had large flakes of paint and other areas where the paint had come off exposing the underlying wall board. In addition some of the areas of the wall above the janitor sink were no longer substantially impervious to moisture because the underlying wall board was exposed.

Per this Section of the Regulations, premises shall be kept clean and in good repair to protect the health of the animals and to facilitate the prescribed husbandry practices as set forth in this subpart.

The facility needs to address the excessive dust and clutter on the top of the caging rack and address the condition of the wall above the janitor sink in order to keep the premises clean and maintained in good repair.

Correct item (1) by 4/20/15; and item (2) by 7/20/15.

NOTE - Exit interview held 4/13/15 on-site with facility personnel. Report delivered by e-mail 4/17/15.
