Vet Tech Institute

Type: ROUTINE INSPECTION
Date: 15-APR-2024

2.31(c)(7)

Institutional Animal Care and Use Committee (IACUC).

The facility protocols had a change in Principal Investigator (PI) that was not approved by the IACUC. The PI for the dog, cat, and rabbit protocols left the facility several months ago, and the change to a new PI was not approved by the IACUC. A change in Principal Investigator for a protocol is considered a significant change which can affect the way that animal activities are conducted and thus the care and use of such animals. To ensure the humane treatment of animals, the IACUC must review and approve, require modifications in, or withhold approval of proposed significant changes regarding the care and use of animals in ongoing activities. Correct by seeking IACUC approval of the significant change in the protocols by either full Committee review or designated member review.

Correct by: May 1, 2024.

3.13(a)

Veterinary care for dogs.

The facility does not have a current, written program of veterinary care for dogs. The previous attending veterinarian left the facility several months ago and a different veterinarian has taken her place in the interim, however, they do not have a documented and signed program of veterinary care in place for the current attending veterinarian.

Failure to maintain a documented and signed program of veterinary care can result in a lack of understanding and direction in the general health and well-being of the animals.

Correct by having the attending veterinarian document and sign a program of veterinary care.

Correct by May 1, 2024.

This inspection and exit interview were conducted with a facility representative.
