Merry Gumm
1482 51st Rd
Douglass, KS 67039

Customer ID: **500530**
Certificate: **48-A-2212**
Site: 001
MERRY GUMM

Type: ROUTINE INSPECTION
Date: 26-MAR-2019

2.50(a)(1) REPEAT

TIME AND METHOD OF IDENTIFICATION.

Adult dogs are not officially identified. Proper identification allows for tracking of dogs into, within, and out of the kennel. All adult dogs older than 16 weeks of age must be officially identified at all times.

2.50(a)(2) REPEAT

TIME AND METHOD OF IDENTIFICATION.

One weaned puppy from a separate litter is being housed together in the same primary enclosure with three weaned puppies of another litter. Co-mingling of separate litters can complicate individual animal identification. Puppies from separate litters housed together must be individually identified.

3.11(a) REPEAT

CLEANING, SANITIZATION, HOUSEKEEPING, AND PEST CONTROL.

There is an excessive amount of excreta on the floor in the the large shelter housing 4 weaned puppies. Excessive excreta can increase disease transmission as well as soil the puppies. Feces must be removed from the primary enclosure on a daily basis.

This inspection and exit interview were conducted with a facility representative.

Additional Inspectors

Shaver Margaret, Veterinary Medical Officer
