Customer ID: **8797**  
Certificate: **43-C-0180**  
Site: TRA  
JASON & NICOLE PHILLIPS

Type: ROUTINE INSPECTION  
Date: 31-JUL-2017

### 2.40(b)(2)

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

During the inspection two animals were identified as needing veterinary care. A pygmy goat female with tag #0388 has a golf ball-sized hardened lump in front of her right shoulder. This could be the result of many possible disease processes, including but not limited to inflammation, infection, immune disease, or cancer. A female mini Hereford has an opaque white spot on the cornea of the right eye. Eye conditions can be extremely painful and can result in blindness or loss of the eye if left untreated. The licensee had no documentation that these conditions had been noticed or treated previously; however, health certificates dated 19 July 2017 showed no abnormal conditions documented by the examining veterinarian.

These animals must be examined by and treated in accordance with a licensed veterinarian's instructions. Prior to the delivery of the report, the licensee had documentation from the site veterinarian who had examined both of these animals and provided instructions for treatment.

Corrected at the time of exit.

This inspection and exit interview were conducted with the licensee at the Ohio State Fair in Columbus, OH. The camel rides, petting zoo area, and pig race show were observed at this inspection.

#### Additional Inspectors

Sebera Shannon, Animal Care Inspector
