Type: ROUTINE INSPECTION
Date: 03-APR-2023

3.15(e)(1) Direct

Primary enclosures used to transport live dogs and cats.

A flight containing 27 dogs arrived at JFK International Airport on April 3, 2023, at 12:49 pm ET, shipped from Zhengzhou International Airport (Zheng Zhou, China) on April 2, 2023 (AWB #272-CGO73243376).

The primary enclosure for "Loki" (microchip #900219001383440) contained inadequate space. "Loki" measured 42 inches in length and 30 inches in height, while the transport crate measured 32.5 inches in length and 24.5 inches in height. Inadequate space during transport can cause stress, uncomfortable conditions, and prevents normal postural adjustments. Primary enclosures used to transport live dogs must be large enough to ensure each animal has enough space to turn about normally while standing, to stand and sit erect and to lie in a natural position.

This inspection was conducted with animal facility representatives on April 3, 2023. The exit interview was conducted by phone on April 6, 2023 with an airline representative.
