Customer ID: **6020608**
Certificate: **43-C-0420**
Site: 001
Kelli Walker

Type: ROUTINE INSPECTION
Date: 29-MAY-2025

3.1(b)

Housing facilities, general.

The three outdoor areas of the sheltered housing facility for five adult cats have an overgrowth of weeds throughout the areas. The weeds are tall and thick enough to make it difficult to see the cats when they walk through the area. Overgrowth of weeds may obscure the outdoor surfaces making it difficult to identify areas that need to be cleaned and may allow harborage for insects and pests. Housing facilities must be free of any accumulation of trash, waste material, junk, weeds, and other discarded material. To be corrected by June 13, 2025.

3.127(d)

Facilities, outdoor.

A primary enclosure containing two kangaroos, and two wallabies is not enclosed with a perimeter fence. A perimeter fence is essential for restricting contact between exotic animals and unauthorized people or animals. A perimeter fence also acts as a secondary containment system in the event an animal escapes from the primary enclosure. The licensee must provide a perimeter fence that is of sufficient height to protect the animals in the facility and keep unwanted animals out. To be corrected by June 27, 2025.

3.133 Critical

Separation.

A serval and a caracal housed in adjacent enclosures were able to interact in a negative manner which resulted in injury and death to the serval. "Milo," a male serval with ID# 900215005286576, was injured by a caracal housed in an adjacent enclosure. The serval died on May 9, 2025 during treatment by a veterinarian to address the injury as was relayed to me by a facility representative. Incompatible animals that are housed adjacent to each other may result in discomfort or injury to the animals. Animals shall not be housed near animals that interfere with their health or cause them discomfort. To be corrected from this time forward – May 30, 2025.

This inspection and exit interview were conducted with a facility representative.
