

Inspection Report

Tulsa Zoo Management, Inc.
5701 E. 36th Street N
TULSA, OK 74115

Customer ID: **327395**
Certificate: **73-C-0196**
Site: 001
Tulsa Zoological Park

Type: ROUTINE INSPECTION
Date: 09-AUG-2023

3.125(a)

Facilities, general.

- The indoor area of the jaguar enclosure had three spots where the concrete floor was damaged, resulting in shallow holes that need repair. Damaged sections of concrete floor are difficult to clean properly, and could provide a reservoir of standing water and potential contamination of the animals. Facility corrected the problem during the inspection.
- In the outdoor portion of the raccoon enclosure there were three exposed screws on a hanging branch. The branch is one the raccoon is able to access. Exposed screws are a potential source of injury to the enclosed animals and should be removed as soon as they are noticed. Facility corrected at the time of inspection.

This inspection and exit interview were conducted with facility representative.
