Certificate: **58-C-1161**

Site: 001

PELICAN HARBOR SEABIRD
STATION

Type: ROUTINE INSPECTION

Date: 24-JUN-2021

2.40(a)

Attending veterinarian and adequate veterinary care (dealers and exhibitors).

A current/updated written Program of Veterinary Care (PVC) was not available for inspection; PVC presented for inspection was from calendar year 2017. In order to comply with this section of the Animal Welfare Act (AWA), a recently updated written PVC by the Attending Veterinarian (AV) must be in place and available for inspection at all times. Also, the facility must ensure the AV conducts regularly scheduled visits to the premises where regulated animals are kept. To ensure adequate veterinary medical care to regulated animals, the facility's PVC must be regularly updated.

Correct by: July 24, 2021

3.125(a)

Facilities, general.

Several areas of extremely damaged/rotted wood were observed at the opossum's enclosure; frame boards and plywood. Also, a protruding screw and exposed sharp wires were observed on the inside of the enclosure. Primary enclosures for regulated animals at the facility must be free of jagged wood splinters or sharp metal/wire points and edges that might injure the animals; these are potential injury hazards for the animals. Housing facilities for regulated animals must be structurally sound and must be maintained in good repair to protect the animals from injury while containing the animals.

Inspection Report

To prevent discomfort, unhealthy conditions and potential injury to the animals, the damaged wood, protruding screw and exposed wires must be repaired/replaced.

Correct by: July 24, 2021

This inspection and exit interview were conducted with two facility representatives.
