### 3.75(f)

#### Housing facilities, general.

Drainage and waste disposal. There are wet and damp areas in the front sections of the two outdoor enclosures for the capuchins. The areas are muddy below the water receptacles. Housing facilities for non-human primates must be constructed and maintained so that waste and water are rapidly eliminated to prevent pest problems, insects, odors, and disease risks. Correct by improving drainage in these two capuchin enclosures so that water is rapidly eliminated. Correct by October 15, 2023.

This inspection and exit interview were conducted with the facility representative.
