Type: ROUTINE INSPECTION
Date: 19-DEC-2018

2.40(b)(2)

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

Two of the dogs inspected at this facility need to be seen by the attending veterinarian for an evaluation and treatment for their dental condition. Casey a female, poodle has a heavy buildup of brownish-grey dental tartar on most of her teeth with slightly reddened and recessed gums. There was an odor coming from the mouth with increased salivation. BomBom, a male, poodle has a heavy buildup of brownish-grey dental tartar on the entire surface of both sides of the upper and lower cheek teeth as well as the upper portions of both upper canine teeth. The gums are also slightly reddened with gum recession of both upper sides of the mouth.

Dental problems can cause pain and distress, can lead to inadequate nutrition and potentially affect the overall health of the animal. All dogs with a heavy buildup of tartar or teeth and gum issues must be evaluated by a licensed veterinarian for a diagnosis of the problem and to develop an effective treatment plan which must be followed by the licensee. The licensee must ensure that all dogs receive adequate veterinary care at all times.

3.6(c)(1)(iii)

PRIMARY ENCLOSURES.

At the time of inspection the following dogs: Spangle(black, male poodle), Gomer(white, male poodle), Jungle(white, male poodle), Reyna (black, female poodle), and Chabucca(black, female poodle) were individually housed in enclosures which did not allow them to have at least 6 inches above their heads while in a normal standing position. This additional space is required to provide the dogs room for normal postural movements within their enclosures. The licensee must ensure that the interior height of each primary enclosure is at least 6 inches higher than the head of the tallest dog in the enclosure when it is in a normal standing position.
