

Inspection Report

Nature Park At The Shell Factory
2787 N Tamiami Trail
North Fort Myers, FL 33903

Customer ID: **27537**

Certificate: **58-C-0813**

Site: 001

NATURE PARK AT THE SHELL FACTORY

Type: ROUTINE INSPECTION

Date: 21-FEB-2019

3.125(a)

FACILITIES, GENERAL.

There are four nails protruding and several larger holes in the aged wood planks on top of the Muntjac shelter. These protruding nails could cause injury if the Muntjac came in contact with them and their body parts could get caught into the larger holes. These aged wood planks needs to be replaced and maintained in good repair to protect the animals from injury.

3.127(d)

FACILITIES, OUTDOOR.

The chain link perimeter fence behind the Zebra enclosure has a few damaged top rails bent from falling tree branches. This area has heavy brush leaning over the perimeter fence that will cause further damage if not removed and it doesn't restrict unauthorized animals from entering the facility.

Perimeter fences must be constructed so that it protects the animals in the facility by restricting animals and unauthorized persons from going through it or under it and having contact with the animals in the facility, and so that it can function as a secondary containment system for the animals in the facility.

This inspection and exit interview was conducted with the facility representative.
