Type: ROUTINE INSPECTION
Date: 12-MAY-2015

2.31(c)(2)

INSTITUTIONAL ANIMAL CARE AND USE COMMITTEE (IACUC).

The IACUC semi-annual facility checklist and report for November 2014 shows that indoor animal and study areas were inspected, but outdoor animal facilities, which includes the barn, goat, pig and llama areas, were not. Regular reviews are necessary to ensure IACUC oversight of animal facilities. The IACUC, as an agent of the research facility, should inspect, at least once every six months, all of the research facility's animal facilities, including animal study areas, using title 9, chapter I, subchapter A-Animal Welfare, as a basis for evaluation.

To be corrected from this day forward

3.131(c)

SANITATION.

The following housekeeping issues were noted: 1) In the barn, the refrigerator used to store medical materials had a moderate accumulation of debris collecting. 2) In the indoor/ outdoor kidding area, there was a broken heat lamp in an area that the goats could access. 3) In the indoor/ outdoor kidding area, there was debris and some cobwebs present. 4) In goat pen number 2, a section of the back fence was in disrepair and sharp points were protruding into the animal enclosure. There were no goats housed in pen 2 at time of inspection.

Animal areas, including buildings and grounds, should be kept clean and in good repair to protect the animals from injury and to facilitate the prescribed husbandry practices set forth in this subpart.

To be corrected by May 22, 2015

An exit briefing was conducted with the facility representative.
