### 2.33(b)(3)

#### Attending veterinarian and adequate veterinary care.

2 goats and 4 cows were observed to have severely overgrown hooves, and had not been reported to the attending veterinarian for guidance. Overgrown hooves may limit mobility, impede normal herd behavior and interaction, and present a risk for injury. The facility must ensure that all problems of animal health are conveyed to the veterinarian in a timely manner.

Correct from February 8, 2024 forward.

This inspection and exit interview were conducted with the facility representative.
