### 2.1(b)(2)

#### Requirements and application

The licensee obtained the following animals since the re-license inspection on 02/22/2022 and the follow-up inspection conducted on 05/12/2022: 2 Goats, 2 Sheep, 2 Alpaca, and 3 Rabbits.

These species were not included on the license application. Currently, the number of animals present at the time of inspection exceed the number of animals authorized for the license. The licensee decided to expand the business to include farm animals and additional small exotic mammals.

Licenses authorize a specific number of animals and specific types of animals. The licensee must apply for a new license and include any new species types and the greatest number of animals, per species type, that will be held at any given time in a 3 year period.

Correct by March 6, 2023

This inspection and exit interview were conducted with the licensee.
