Type: ROUTINE INSPECTION
Date: 30-JUL-2025

3.130

Watering.

Several water tubs (2 raccoons, 2 foxes, 2 camels, 5 pigs) held dirty and contaminated water as the only source of water in the pen. The water was cloudy with floating algae, debris and/or large amounts of fecal material. Slime and debris were present on sides and bottom of containers. Contaminated water can be unpalatable and unhealthy for the animals causing illness and distress. All water containers must be kept clean and sanitary.
To be corrected by 8/5/25.

This inspection and exit interview were conducted with facility representatives.
