#### Facilities, general.

A shelter in the muntjac pen near the gift shop is in a state of disrepair. There is a hole in the wooden threshold at the entrance of the shelter approximately 4" x 2". A corner of metal edging is bent away from the wall, exposing sharp metal edges and two screws. There are several areas of peeling paint outside of the enclosure. Two old, rotten wood ceiling boards have large holes and the wood is caving into the shelter. Sharp edges, holes in the floor, unstable ceilings, and paint can cause injury or harm to the animals. Correct by January 31, 2023 by ensuring indoor and outdoor housing facilities are structurally sound and maintained in good repair to protect the animals from injury. The facility took measures to correct the issue during the inspection.

This inspection and exit interview were conducted with a facility representative.
