JOHN AND AMMON YODER

Type: ROUTINE INSPECTION
Date: 17-AUG-2016

2.50(a)(2)

TIME AND METHOD OF IDENTIFICATION.

At least 4 litters of puppies were found to have no individual information recorded on cage cards. The information provided on the current card system was adequate for the other litters of puppies. Failure to properly identify animals makes animal traceability very difficult to impossible and may impede follow-up of any safety, health and welfare concerns. Puppies need to be individually identified with all necessary information. Correct this by ensuring proper identification to all adult dogs and puppies at the facility.

Correct by 24 August 2016

Inspection and exit interview conducted with Licensee and Veterinary Medical Officer, Michael Neafsey.

The inspector completed this inspection report when Animal Care was transitioning to a new information management system. Because the inspector re-typed the inspection report into the new system when it was deployed, the "delivered by" date on this inspection report is different than the date the inspector delivered the original inspection report, which occurred on 17-August-2016.
