

Inspection Report

City And County Of Honolulu
151 Kapahulu Avenue
Honolulu, HI 96815

Customer ID: 3395

Certificate: 95-C-0049

Site: 001

CITY AND COUNTY OF HONOLULU

Type: ROUTINE INSPECTION

Date: 30-MAR-2015

3.75(c)(1)(1)

REPEAT

HOUSING FACILITIES, GENERAL.

While repairs had been made to the rusted areas cited on the previous inspection report, excessive rust was observed in different non human primate den areas. Rust was seen in several places in chimpanzee dens. Patches of peeled paint and rusted metal were observed on both furniture and enclosure walls and doors. The metal had rusted completely through the bottom of a section of metal tubing at the base of one of the chimpanzee doors. Another section of metal tubing was heavily rusted in the baboon den area.

Rusted metal may have rough edges that may injure the animals and be difficult to clean. Rust may compromise the integrity of metal structures. Animal housing should be maintained in good repair to protect and contain the animals.

Previous correction date: Correct by September 11, 2014.

3.81

ENVIRONMENT ENHANCEMENT TO PROMOTE PSYCHOLOGICAL WELL-BEING.

The plan for environmental enhancement could not be located at the time of the inspection. The facility should ensure that the plan is available for APHIS inspectors so that it may be reviewed and it's contents assessed.

Correct by April 7, 2015.

3.125(a)

REPEAT

FACILITIES, GENERAL.

The rusted metal and chewed wooden surfaces cited in the previous inspection had been repaired, however additional areas of rust were noted during the current inspection. Several areas of rust and peeling paint were observed on doors in the giraffe night quarters.
