Type: ROUTINE INSPECTION  
Date: 31-JAN-2024

---

### 2.75(b)(1) Repeat

#### Records: Dealers and exhibitors.

There were still no records of acquisition or record of animals on hand available at the time of the inspection for the ducks, turkeys, chickens, peacocks, and quail.

Per this Section of the Regulations, exhibitors shall make and maintain complete records regarding the details of the acquisition and disposition of animals in their possession in order to account for all animal transfers and the sources of the animals. The Licensee needs to prepare records of acquisition and a record of animals on hand for the birds and ensure that the animal records are kept current for all future animal acquisitions.

### 2.134(c)

#### Contingency planning.

Although the Licensee has developed and there is a Contingency Plan in place, the animal caretakers/husbandry staff have not been trained on the Plan.

Per this Section, exhibitors must provide training for their personnel regarding their roles and responsibilities as outlined in the Contingency Plan. Training of personnel on the provisions of the facility's Contingency Plan ensures all employees are familiar with the Plan and the animals receive proper care during emergency situations. Correct by 2/16/24.

### 3.55 Direct

#### Watering.

One rabbit stood on its hindlegs and began to scratch and paw at the wire mesh front of the enclosure near the water bottle when the inspector and facility representative approached the hutch located inside a metal frame storage shelter. Closer examination revealed that most of the water in the bottle was frozen and the water inside the bottle's metal sipper tube was also frozen, blocking the flow of water. The facility representative immediately offered water in a bowl to the rabbit and the rabbit drank continuously for almost 2 minutes.

Per this Section, rabbits shall be provided with water daily. Lack of drinking water can adversely affect the health of animals. Cold winter temperatures can cause freezing of the drinking water and limit the availability of water for the

**Environment enhancement to promote psychological well-being.**

Although the birds at the facility were socially housed and were provided with materials to enhance their environment, a written plan for environmental enhancement to promote the psychological well-being of the birds is still under development and has not been reviewed by the Attending Veterinarian.

Per this Section, exhibitors must develop, document, and follow a species-appropriate plan for environment enhancement to promote the psychological well-being of birds. The plan must be approved by the Attending Veterinarian and must be in accordance with currently accepted professional standards as cited in appropriate professional journals or reference guides. At a minimum, the plan must address each of the following: social grouping, environmental enrichment, special considerations, restraint devices, and exemptions. The Licensee needs to develop an environmental enrichment plan appropriate for the species of birds maintained and the plan must be approved by the Attending Veterinarian.

This inspection and exit interview were conducted with facility representative.
