

## Inspection Report

River Birch Animal Farm  
P O Box 159  
Locust Hill, VA 23092

Customer ID: **321531**  
Certificate: **52-C-0257**  
Site: 001  
RIVER BIRCH ANIMAL FARM

Type: ROUTINE INSPECTION  
Date: 07-NOV-2016

### 2.40(b)(2) DIRECT

#### ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

A single housed neutered male pig was found to have skin lesions on the ears, jowl and flank. On the middle of the outer surface of each ear there was a red superficial ulceration of the skin with brown crusty debris. The tip of the ears also had a brown crusty lesion. On the right jowl there was an approximately 1cm deep circular ulcerative lesion on the skin. The right lower flank had multiple red ulcerative dermal lesions with a brown crusty debris around the edges of the lesions. All lesions were attracting flies.

Correct by 8 November 2016.

### 2.75(b)(1) REPEAT

#### RECORDS: DEALERS AND EXHIBITORS.

There was no record of animals on hand or record of acquisition and disposition available for review at the time of inspection. In order to meet the regulatory requirement, these records must be maintained and updated on a regular basis, and made available to the inspector for review upon request. The records must be recreated, accurate and current by 14 November 2016.

The record of animals on hand was corrected at the time of inspection.

### 3.125(a) REPEAT

#### FACILITIES, GENERAL.

The indoor and outdoor housing facilities shall be structurally sound and maintained in good repair to protect the

## Inspection Report

---

animals from injury and to contain the animals.

The pasture still has potential hazards that could cause injury to the animals that have access to this area. Primarily this includes broken glass that has been exposed due to bulldozer activity, but also loose wire and discarded baling twine that could cause entanglement.

The hazards must be removed from the pasture or the animals precluded from entering the hazardous area.

Correct by 9 December 2016.

### 3.131(d)

#### **SANITATION.**

A safe and effective program for the control of insects, ectoparasites, avian and mammalian pests shall be established and maintained. The food storage shed has a rodent problem as evidenced by large amounts of rodent feces found throughout the shed. The feed needs to be maintained off the floor. Feed stored in bins need to be secured with a lid. Pest control measures need to put in place.

Correction to start immediately and be ongoing.

This inspection and exit interview were conducted with the president.
