

Inspection Report

Seneca Ridge Inc
811 Blacks Hill Rd
Great Falls, VA 22066

Customer ID: **2472**
Certificate: **52-C-0018**
Site: 001
SENECA RIDGE INC

Type: ROUTINE INSPECTION
Date: 08-JUL-2014

2.131(c)(1)

HANDLING OF ANIMALS.

***A barrier fence is not in place around the new cavy exhibit. The public can walk directly up to the enclosure and possibly come in direct contact with the animals. A barrier fence is needed to minimize the risk of harm to the animals and the public. A barrier fence must be constructed completely around the cavy enclosure to prevent harm to the animals therein and to assure the safety of the public. Or, the animals must be moved into an enclosure with an appropriate public barrier. Correct by July 14, 2014.

3.78(b) DIRECT

OUTDOOR HOUSING FACILITIES.

***There is inadequate shelter from the sunlight in the ringtail lemur enclosure. Three (3) of the four (4) lemurs do not have access to the shelter box. The enclosure does not provide adequate shelter from the sun as the lemurs are huddled in a small area of shade in the front corner of the enclosure. Shelter in the primary enclosure must provide sufficient shade for all animals in the enclosure at one time. A method to provide adequate shelter or shade from the sun must be provided to protect the lemurs from illnesses associated with over-exposure to sunlight and excessive heat. Correct by July 9, 2014.

3.81

ENVIRONMENT ENHANCEMENT TO PROMOTE PSYCHOLOGICAL WELL-BEING.

***Although all animals are socially housed and provided with environmental enrichment, there is no written plan that outlines the current enrichment program that has been implemented for the psychological well-being of the lemurs and gibbons. Exhibitors must develop an appropriate plan for environment enhancement as directed by the attending veterinarian to promote the psychological well-being of the nonhuman primates. A written environmental enrichment plan must be developed with guidance and approval from the attending veterinarian to ensure the

Inspection Report

lemurs and gibbons are provided enrichment that will prevent or minimize abnormal psychological behaviors. Correct by July 25, 2014.

3.125(a)

FACILITIES, GENERAL.

***The new African crested porcupine enclosure has exposed underground fencing with 4x4 openings in the area under the log structure. The openings allow the feet of the porcupine to pass through easily and makes it difficult for the animal to walk or rest under the log structure, which provides shelter from the sun and inclement weather. Primary enclosures must be constructed in a manner that is appropriate for the species enclosed within. The large openings in the fencing is not appropriate for the African crested porcupine. The fencing must be replaced with a material that does not allow the feet to pass through to prevent injury and for the comfort of the animals. Correct by July 11, 2014.

This inspection included only animals and facilities at the Leesburg, VA location.
The exit briefing was conducted with the facility representative.
