KALITTA AIR LLC  
818 WILLOW RUN RD  
YPSILANTI, MI 48198

Customer ID: **13185**  
Certificate: **34-T-0006**  
Site: JFK  
KALITTA AIR LLC

Type: ROUTINE INSPECTION  
Date: 15-SEP-2023

### 3.15(a)(9) Direct

#### Primary enclosures used to transport live dogs and cats.

A total of 25 dogs and 6 cats arrived at JFK International Airport on September 15, 2023, shipped from Qingdao, China on Kalitta Airlines, flight K495 (Air Waybills #27272491112 and #27273519341).

The following primary enclosures had leakage of waste products:

- A gray and brown, male, French bulldog "Ross" (microchip# 900219001632400).
- A brown and white, male, American bully "Perfect" (microchip# 900219001632396).
- A brown and white, female, American bully "Teri" (microchip# 900219001599871).
- A cream, male, French bulldog "Miko" (microchip# 900219001632386).
- A lilac, male American bully "Quillian" (microchip# 900219001632392).
- A gray and brown, male, French bulldog "Ezra" (microchip# 900219001632514).

Direct contact with excreta can cause uncomfortable conditions, soilage of animals, strong odors, and exposure to disease hazards. Carriers must ensure that primary enclosures have a solid, leak-proof bottom or a removable, leak-proof collection tray under a slatted or mesh floor that prevents seepage of waste products, such as excreta and body fluids, outside of the enclosure.

This inspection was conducted with animal facility representatives on 9/15/2023. The exit interview was conducted with an airline representative by phone on 9/20/2023.
