3.15(a)

Primary enclosures used to transport live dogs and cats.

During the past several months, the registrant has transported dogs in a vehicle for hire without being contained in a primary enclosure. Photos from the registrant's Facebook page showing dogs being transported without primary enclosures were referred to and discussed with the registrant. The registrant stated she is aware of the photos and agreed she has transported some dogs in her vehicle without primary enclosures at the pet owner's request. The registrant explained that she now presently transports all animals in required primary enclosures. Failure to transport dogs and cats in the required primary enclosures does not adequately contain the animals or protect them from potential injury during the normal rigors of travel. All dogs or cats must be contained in a primary enclosure such as a compartment, transport cage, carton, or crate during transport.

Correct by close of business 08/04/2023.

This inspection and exit interview were conducted with the registrant.
