

Inspection Report

Shirley Farms
2557 South Bluff Rd
Obion, TN 38240

Customer ID: **44856**
Certificate: **63-C-0201**
Site: 001
SHIRLEY FARMS

Type: ROUTINE INSPECTION
Date: 04-MAY-2015

2.40(a)(1) REPEAT

ATTENDING VETERINARIAN AND ADEQUATE VETERINARY CARE (DEALERS AND EXHIBITORS).

Since the last inspection, the new attending veterinarian has visited the facility for a formally scheduled visit to the premises and has signed a written program of veterinary care. However the written program of veterinary care does not include all species currently at the facility (zebu and bison) and does not include pertinent details regarding the veterinary care of the animals. There is no information about what dosages or frequency of administration are recommended for the few drugs and vaccines listed. There is no information as to parasite control methods, capture methods or TB testing for the exotic species. There is no information included regarding vaccinations, parasite control methods, emergency care or euthanasia of the domestic species. The owner states he has contacted the attending veterinarian but has not yet had the written program of veterinary care updated. The facility shall ensure that there is a complete written program of veterinary care approved by the attending veterinarian.

3.81 REPEAT

ENVIRONMENT ENHANCEMENT TO PROMOTE PSYCHOLOGICAL WELL-BEING.

The new attending veterinarian has signed a written environment enhancement program that is not complete. It does not include all the non-human primate species currently at the facility (snow macaque), does not cover all special considerations currently in place at the facility (isolated spider monkey) and lacks species specific recommendations for socialization and environmental enrichment. Non-human primates are highly social animals whose psychologically well-being, to include socialization, environmental enrichment and special considerations, needs to be cared for in order to ensure their overall well-being. The owner states he has contacted the attending veterinarian but has not yet had the written program updated. Under the direction of the attending veterinarian and in accordance with accepted professional standards, the facility shall develop, document and follow an appropriate plan for environment enhancement adequate to promote the psychological well-being of the non-human primates.

3.127(d) REPEAT

FACILITIES, OUTDOOR.

Since the last inspection there have been no changes to any perimeter fencing and the owner states that no

Inspection Report

amended variance request has been submitted to the Regional Office. A written draft of the variance request letter viewed today has been started and almost completed but has not yet been submitted to the Regional Office. A secondary perimeter fence is required to ensure that the animals are not injured/distressed by outside animals/wildlife/humans and to act as a secondary containment system in case of escape. The housing facilities for all the outdoor non-farm animal species exhibited must be enclosed by a secondary perimeter fence of at least 6 ft height or an addition to the current variance needs to be obtained.

This is a focused inspection on the non-compliances from the previous inspection report.
Exit conducted with owner and undersigned facility representative.
